

Digital Citizenship Event

Warm-up (10 minutes)

ASK:

What would you do if someone you don't know asked you for your address and your phone number?

Students should be aware that they should never give out this information except with the permission of a trusted adult. You can use this as an opportunity to check that your students know this information. If they do not, help them memorize it.

DEFINE the Key Vocabulary term **private**.

EXPLAIN to students that it is important for them to know certain information about themselves, but that it is also important to keep this information private. They should keep it to themselves and not share it, except when they are dealing with trusted people such as relatives, teachers, or close friends.

INVITE students to give examples of information that they should keep private. Write down their responses on the board or chart paper so that you can return to them later in the lesson. Make sure they understand that private information includes the following:

- full name
- age
- address
- telephone number
- email address (or parents' email addresses)
- where they go to school or after school
- where their parents work

ENCOURAGE students to discuss why it is important to keep this information private. Stress that it is never safe to give out private information to people they don't know. They should always ask a parent or caregiver before they give out private information to anyone.
